## Offer for our potential partners

We suggest combining logistics potential of “Jancom” JSC with marketing, informational and investment potential of the persons interested, in order to ensure a stable development of the enterprise, improvement of its competitiveness and effective sales. The result of this activity will be provision to the enterprise's customers of fresh and organic fruit grown in the ecological zone of the south of the Republic of Moldova.

Our enterprise is always open for potential investors.

## The main objectives of the project regarding production, storage, grading, packing and sale of fresh fruits and vegetables:

1. Combine the manufacturing, informational, investment, logistics, sales potential of the investors to set up an effective system of agricultural production, logistics and sales of agricultural products (grapes, fruits, vegetables, berries);
2. Implementation at the enterprise of the international standards regarding safety, quality, packaging and storage of grapes, fruits, vegetables, berries;
3. Delivering goods which are competitive on the national and international markets;
4. Ensure stability, increase in sales and export of products to foreign markets;
5. Create an effective integrated logistics (agricultural production, storage, transportation, export, retail and more);
6. Promote the attraction of investments in the cultivation, logistics and sale of fruit and horticultural products;
7. Ensure a stable development of the enterprise.

**We will be glad to consider your offers!**
